

# Don't forget to schedule your child's required dental assessment!

## What is the Kindergarten Oral Health Assessment (KOHA)?

To make sure your child is ready for school, California law requires that children have a dental assessment by **May 31** in either kindergarten or first grade, whichever is their first year in public school.

# mmmm

### Why is it important?

Poor oral health can affect a child's attendance, grades and overall performance in school. The KOHA helps ensure children are healthy and ready for a successful school year.

#### **SCHOOL READINESS FACTS:**

- Children who have poor oral health often miss more school and receive lower grades than children who don't.
- Children with cavities may also have difficulty eating, talking, and concentrating in school.
- Healthy smiles make children feel confident and good about themselves.
- Establishing good oral health habits in childhood helps create a lifetime of healthy smiles.

#### **HOW TO COMPLETE THE KOHA:**

- Look out for a registration form that will be distributed when you register your child for school.
- · Visit or find your dental home.
- Complete the dental assessment 12 months before entering public school for the first time or by May 31st of their first year (Kindergarten or 1st Grade).

1 in 5 children have untreated tooth decay in California.\*

## Why is it important to have a dental home?

- It allows the dentist to establish a relationship with your family.
- It gives the dentist consistent opportunities to provide preventive treatment and find small issues before they become big.
- Children who develop a familiar relationship with their dentist are less likely to experience dental anxiety and are more likely to visit the dentist regularly into adulthood.

Medi-Cal covers dental check-ups every 6 months for children.
